

“Thank you” just does not seem adequate enough to convey how I feel about my recent treatment at Dr.Bath’s office.

He and his team made me feel extremely comfortable while maintaining a professional atmosphere. They all show great knowledge in skin care.

I have had Botox treatments with Dr.Bath for a couple of years now, and when he approached me about Pelleve’ treatments, I have to admit I was a bit skeptical. However, he took his time explaining the entire treatment and its effects and I trusted his knowledge. I scheduled my first treatment immediately!

When I arrived for my first treatment, I was greeted by friendly team members who promptly took me to a private room where they once again explained the treatment and allowed me to ask multiple “last minute” questions.

The Pelleve’ treatment took about 45 minutes and was not really uncomfortable at all.

I did not notice any major differences in my skin immediately but after my second treatment, I started to notice that the skin on my face was feeling thicker and make up seemed to glide on easier. I had several co-workers notice that something was different about me. One said, “Your skin looks great...what are you using?” Another said “Patty, you’re glowing. Are you in love?” I laughed and then explained that I had been receiving Pelleve’ treatments at Dr.Bath’s office.

My skin is smoother, more resilient and after years of smoking, I have noticed that the “smoker” lines around my mouth have virtually disappeared.

I am 46 years old and my career involves conversing face to face with others on a daily basis. I now feel confident that they are seeing a younger looking face again.

It was such a pleasure working with Dr.Bath and his team. Thank you all for making this experience such a huge success for me!

*Sincerely,
Patty*
